
YEAR 10 SUBJECTS

Architecture

The Architecture subject will suit you if you are interested in developing skills in drawing and designing architectural structures, particularly housing. You will be involved in the development of architectural drawings to communicate designs and detailed information.

Subject specific skills are:

- You will be able to understand and use architectural drawing standards
- You will create architectural plans and elevations
- You will develop 3D exterior and interior drawings by using both freehand and technical drawing techniques
- You will develop skills in 3D modelling

You will develop a folio of work through:

- Architectural rendering techniques
- Application of rendering techniques to represent architectural structures
- Use of the Design Process to design an architectural structure
- Use of Adobe Illustrator for the creation of 2D architectural drawings
- Use of SketchUp for the creation of 3D architectural drawings

Please Note: A subject levy applies to this subject (see Subject Cost Schedule for details).

“Year 10 Architecture gives you a good insight into what is needed for VCE Visual Communication and Design. The class is enjoyable as well as educational. You learn all the essential skills and knowledge that then leads into VCE Visual Communication Design. The subject teaches you about the use of scale and how to draw to scale. Throughout the semester, you are to set out a folio to showcase the progress of your designing and in the end, you will produce a three dimensional model of the house that we designed throughout the semester.”

Charles Norman
