
YEAR 10 SUBJECTS

Furniture Construction

Furniture Construction allows you to focus on the design and production of a larger piece of furniture that incorporates a range of construction and finishing methods. Projects could include tables and framed constructions. You will be encouraged to design a product that suits your individual needs and that incorporates a range of skills, processes and materials, including materials other than wood. You will research a range of construction methods so that informed decisions can be made in the production of your work.

Subject specific skills are:

- You will develop an understanding of the stages involved in designing and making a product, researching, design and production planning, documentation and evaluation, including the production of detailed working drawings and project costing
- You will develop your skills in freehand sketching and techniques to visually communicate design ideas to others
- You will develop skills in a range of furniture construction techniques
- You will develop competency in the safe use of a range of machines and tools, and how to select the appropriate tool/machine and process for specific tasks

Please Note: A subject levy applies to this subject (see Subject Cost Schedule for details).

“Year 10 Furniture Construction is a great subject as it gives students who are into designing and producing their own designs a chance to do this. Furniture construction is a great resource of knowledge and learning which helps in the VCE Product Design and Technology course. The class gives you essential life skills that will stick with you forever. Throughout the semester, you need to plan a product that you then make, along with a portfolio that shows your progress. You end up with a piece of furniture for yourself or someone else.”

Charles Norman
