
YEAR 10 SUBJECTS

Architecture

The Architecture subject will suit you if you are interested in developing skills in drawing and designing architectural structures, particularly housing. You will be involved in the development of architectural drawings to communicate designs and detailed information.

Subject specific skills are:

- You will be able to understand and use architectural drawing standards
- You will create architectural plans and elevations
- You will develop 3D exterior and interior drawings by using both freehand and technical drawing techniques
- You will develop skills in 3D modelling

You will develop a folio of work through:

- Architectural rendering techniques
- Application of rendering techniques to represent architectural structures
- Use of the Design Process to design an architectural structure
- Use of Adobe Illustrator for the creation of 2D architectural drawings
- Use of SketchUp for the creation of 3D architectural drawings

Please Note: A subject levy applies to this subject (see Subject Cost Schedule for details).

“Year 10 Architecture was very interesting and fun to partake in. The class was very enjoyable and educational. I learnt how to design a building according to a design brief and to the client’s needs and wants. The tools you learn in Architecture will help you with VCE Visual Communication Design. You will learn how to set out a folio and how to build a 3D model out of cardboard. Throughout the semester, you are taught how to use Adobe Illustrator and Sketch Up, computer programs that will also help you in VCD.”

Catherine Honeyborne
