
YEAR 10 SUBJECTS

Money Management

This is a financial literacy course designed to introduce students to the fundamentals of 'money' in their every day lives. It will give students an understanding of, and practical experience in a number of life situations. It involves the study of topics such as Earning, Spending, Saving and Investing. Students will take part in the ASX online sharemarket game where they will gain a real life insight into the world of finance. Students will become well equipped to make informed consumer decisions and gain skills that they will use beyond their years at school. They will also gain practical skills in all aspects of purchasing property and personal budgeting.

Subject specific skills are:

- You will demonstrate skills required to successfully plan and manage personal finances
- You will use the inquiry process to investigate, analyse and interpret information
- You will make informed economic and consumer decisions, demonstrating the development of personal financial literacy
