

# Setting the Foundations

**Our brand-new Junior School is set to become the star in Melbourne's north west!**

This totally revamped campus will set the foundations for Overnewton's youngest students, supported by experts in early education, all at the one location.

Portable classrooms will be replaced with architecturally designed, spacious, light-filled modern buildings. Current Middle School facilities will be renovated and refurbished to modern education design criteria, meeting the requirements of our Junior School students.

Prep to Year 4 students will thrive in classrooms equipped with state-of-the-art teaching technologies and ergonomic furnishings. Play areas will be tailored to their needs and designed to stimulate their minds in an environment dedicated solely to them.

Students will now have equal access to resources and facilities, and the entire Junior School teaching staff all in one location.

We will pique their interest and fuel their curiosity in an age-appropriate environment.

And yes, class sizes will remain the same.
